Amadeus API References

Entries highlighted in green are used in the solution code.
Of course, you could use other APIs if you wish, e.g. Airport & City Search instead of City Search.

Authorization

API	Methods	Endpoint URI	API Reference
Authorizing your application	POST	https://test.api.amadeus.com/v1/security/oauth2/token	https://developers.amadeus.com/self-service/apis-docs/guides/developer-guides/API-Keys/authorization/

Flight Booking

API	Methods	Endpoint URI	API Reference
Flight Offers Search	GET, POST	https://test.api.amadeus.com/v2/shopping/flight-offers	https://developers.amadeus.com/self-service/category/flights/api-doc/flight-offers-search/api-reference
Flight Offers Price	POST	https://test.api.amadeus.com/v1/shopping/flight-offers/pricing	https://developers.amadeus.com/self-service/category/flights/api-doc/flight-offers-price/api-reference
Flight Create Orders	Production only		
Flight Order Management	GET, DELETE	https://test.api.amadeus.com/v1/booking/flight-orders/{flight-orderId}	https://developers.amadeus.com/self-service/category/flights/api-doc/flight-order-management/api-reference
